Preparing the books to read every day is enjoyable for many people. However, there are still many people who also don't like reading. This is a problem. But, when you can support others to start reading, it will be better. One of the books that can be recommended for new readers is 2nd Grade Plants Unit Study. This lesson plan for the second grade classrooms can not only teach students the science of plants, but also begin their awareness of the ecological benefits of plants. Most classrooms have enough light to grow plants indoors. Students will begin growing their own plants, recording the changes in a Plant Log.
