

# Download Ventrilo Server Admin Guide

Voice communication over the internet. When using ventrilo behind a firewall/router it is important that your router allow a connection to be established on the port specified by the server that you are going to connect to. Ventrilo, or "Vent", is another Voice over IP (VoIP) software released under proprietary freeware license. It offers surround sound positioning and special sound effects on a per user, per channel, per server or global configuration level. See also: Server:Icecrown US/High End Crafting Icecrown Ventrilo Server Edit. Recently, a Ventrilo server for the players of Icecrown has been setup. Channels are organized for both Alliance and Horde PvP, with multiple channels for each battleground. cs server list cs serveriai cs servai cs server cs servers mod gg gungame csdm zombie zm deathrun surf gg gungame war3 wc3 warcraft war3ft superhero sh mode server servers serveris servai serveriai list sarasas sarašas plaque cs css cs:source cs:1.6 cs:s cstrike counter-strike:source counter-strike strike counter half-life hl hl2 half-life2 1.6 source mod mods modas modai ft frozen throne III ...
